Simple C++ Program :

```
#include<iostream>
using namespace std;
int main(){
    int n;
    long faktorial = 1;
    cin >> n;
    cout << n << "! = ";
    while (n >= 1){
        faktorial *= n;
        if (n!=1){
            cout << n << " x ";
        }else {
            cout << n << " = ";
        }
        n--;
    }
    cout << faktorial << endl;
    return 0;
}
```
